<b>Heads Up</b>	<b>STANDATA 14-BVC-017 recognizes EnerGuide version 15 for code compliance</b>
Details	<p>STANDATA 14-BVC-017 recognizes the EnerGuide Rating System version 15 (ERS v15) as acceptable for code compliance under the Alberta Building Code Section 9.36.5.</p> <p>Conditions for compliance using ERS v15 include:</p> <ul style="list-style-type: none"><li>• addressing modeling inputs;</li><li>• energy savings in relation to the reference house; and</li><li>• builder reporting to the local safety codes authority.</li></ul>
Resources	<b>Please review all conditions in the STANDATA <a href="#">here</a>.</b>
Additional Information	<p>This equivalency applies to single detached, semi-detached, row houses, and houses with secondary suites only. It does not apply to stacked units or joined units by a common space.</p> <p>ERS v15 compliance may be helpful for those already modeling under other labeling programs such as Built Green.</p>
