

10-Point Plan to Reduce COVID-19 Exposure on Site

- 1 Hand Hygiene**

Wash hands often with soap and water for at least 20 seconds, especially after using restrooms and when entering and leaving work sites. Use hand sanitizer at wash stations and in restrooms.
- 2 Sanitize As You Go**

Use sanitizers or other appropriate cleaning materials to keep your tools, work products, and workstations clean, minimum once per day. Do not leave home without ensuring that your work is clean and sanitized.
- 3 Don't Touch Your Face**

Touching your face can spread germs, so train yourself not to do so.
- 4 Communicate**

If you have any questions or concerns, please call your Mattamy Homes senior builder.
- 5 Keep Your Distance**

Avoid any physical contact with others, including hand-shaking, until COVID-19 is behind us.
- 6 Be Considerate**

Stay home if you are sick to help prevent the spread of germs. If one of your co-workers appears to be sick, they may be asked to leave the site to protect others.
- 7 The PHAC (Public Health Agency of Canada) Is Your Expert**

Visit the PHAC website for up-to-date and accurate information. If you believe that you are sick, do not hesitate to contact your primary care provider.
- 8 Meeting Alternatives**

When possible, avoid meeting in person. Phone calls, emails, and text messaging are appropriate alternatives.
- 9 Clean Your Phone**

Your phone can harbour harmful germs. Be sure to disinfect your phone on a daily basis.
- 10 Prevent Panic**

Rely on this list to be informed and help reduce COVID-19 exposure. Mattamy Homes cares about your health.
