10-Point Plan to Reduce COVID-19 Exposure on Site	
1 Hand Hygiene	Wash hands often with soap and water for at least 20 seconds, especially after using restrooms and after eating and drinking activities. Use hand sanitizer at each entrance and exit.
2 Sanitize As You Go	Use sanitizer or other appropriate cleaning materials to keep your tools, work products, and electronic tools (laptops, mobile devices) clean. Do not use these items without ensuring that your work is done and sanitized.
3 Don't Touch Your Face	Touching your face can spread germs, so keep yourself away from it.
4 Communicate	If you have any questions or concerns, please call your Mattamy Homes team leader.
5 No Touching	Avoid any physical contact with others, including handshaking, until COVID-19 is behind us.
6 Be Considerate	This home if you are sick to help prevent the spread of germs. If one of your co-workers appears to be sick, they may be asked to leave the site or patient office.
7 The PHAC (Public Health Agency of Canada) is Your Expert	Visit the PHAC website for up-to-date and accurate information. If you believe that you are sick, do not hesitate to contact your primary care provider.
8 Meeting Alternatives	When possible, avoid meeting in person. Please calls, emails, and text messaging are appropriate alternatives.
9 Clean Your Phone	Your phone can harbor harmful germs. Be sure to disinfect your phone on a daily basis.
10 Prevent Panic	Read on this list for the latest and best COVID-19 news. Mattamy Homes cares about your health.
